I. INTRODUCTION

II. KOO’S DIAGNOSIS OF JAPAN’S POOR MACROECONOMIC PERFORMANCE
   A. Aggregate demand or potential output?
   B. Credit supply or credit demand?
   C. A “balance sheet” recession

III. KOO’S ANALYSIS OF A BALANCE SHEET RECESSION
   A. Koo’s analysis of a balance sheet recession in an IS-MP framework
   B. Is monetary policy effective in Koo’s model of a balance sheet recession?
   C. Is fiscal policy effective in Koo’s model of a balance sheet recession?
   D. Is the zero lower bound important in Koo’s model of a balance sheet recession?
   E. Koo’s evidence
   F. A balance sheet recession and “debt-deflation”

IV. INSTALLMENT DEBT AND THE FALL IN CONSUMPTION EARLY IN THE DEPRESSION
   A. Overview
   B. Installment debt in the 1920s
   C. Olney’s evidence

V. HOUSEHOLD DELEVERAGING AND THE WEAK RECOVERY IN THE UNITED STATES
   A. Mian and Sufi’s hypothesis
   B. Mian and Sufi’s evidence
   C. Discussion
      1. Are there other possible explanations of Mian and Sufi’s findings?
      2. Do Olney’s and Mian and Sufi’s hypotheses imply a near-vertical IS curve?
      3. Possible policies to deal with balance sheet effects
