

OUTLINE — October 1, 2018

- Imperfect Competition, continued
 - Monopolistic Competition, continued
- Externalities
 - Definitions
- Guest Speaker, Prof. Trevon Logan (Ohio State)
- Externalities, continued
 - Coase Theorem
 - Taxes & Subsidies (and what is "optimal")

PS 2 is due Mon/Tues 15/16

Monopolistic Competition

- Lots of firms
- No barriers to entry/exit
- *Heterogeneous* product

Imperfect Competition Externalities Coase Theorem Optimal Subsidies & Taxes

Profit Maximization

- Max profit when **choose q so that $MR = MC$**

Imperfect Competition Externalities Coase Theorem Optimal Subsidies & Taxes

Entry erodes profit

Imperfect Competition Externalities Coase Theorem Optimal Subsidies & Taxes

Long-Run Equilibrium

Imperfect Competition Externalities Coase Theorem Optimal Subsidies & Taxes

Effect of increased variable cost?

Imperfect Competition Externalities Coase Theorem Optimal Subsidies & Taxes

Market Failure: Externalities

- Your activity affects someone else
- Negative externality
 - Cost borne by someone else
- Positive externality
 - Benefit received by someone else

Imperfect Competition **Externalities** Coase Theorem Optimal Subsidies & Taxes

Guest Speaker: Prof. Trevon Logan

Prof. Trevon Logan

BS, Univ of Wisconsin-Madison
MA, MA, and PhD, UC Berkeley

Title: Hazel C. Youngberg Distinguished
Professor of Economics, at The
Ohio State University

Research specialties

Economic history, health economics
and economic demography

Today's paper, "Do Black Politicians Matter?"

NBER Working Paper # 24190 (google "NBER 24190")

Imperfect Competition **Externalities** Coase Theorem Optimal Subsidies & Taxes

Positive Externality

- Benefits accrue to people who are neither the buyer nor the seller
 - *Education !*
- Private Marginal Benefit
- External Benefit (or, marginal external benefit)
- Social Marginal Benefit (or, marginal social benefit)

Imperfect Competition **Externalities** Coase Theorem Optimal Subsidies & Taxes

Positive Externality

Imperfect Competition **Externalities** Coase Theorem Optimal Subsidies & Taxes

Negative Externality

- Marginal Private Cost (or, private marginal cost)
- Marginal Damage Cost (or, external cost)
- Marginal Social Cost (or, social marginal cost)

Imperfect Competition **Externalities** Coase Theorem Optimal Subsidies & Taxes

Negative Externality

Imperfect Competition **Externalities** Coase Theorem Optimal Subsidies & Taxes

Coase Theorem

- Solution without government possible
- Requires
 - Well-defined property rights
 - No costs to bargaining
 - Only a few people
- Otherwise: government intervention

Imperfect Competition Externalities **Coase Theorem** Optimal Subsidies & Taxes

Encourage behavior with subsidy

- Private market produces too little when there are positive externalities
- Encourage with subsidies
- Example: Prof. Olney buys \$48 Bart ticket each month, paid through pre-tax payroll deduction
 - \$3 paid by Bart
 - \$10 paid by UC Berkeley
 - \$10 paid by federal government
 - \$3 paid by state government
 - Which means just \$22 is paid by Prof. Olney

Imperfect Competition Externalities Coase Theorem **Optimal Subsidies & Taxes**

Negative
Externality:
A Tax

Externalities & Taxes or Subsidies

- The challenge: what is the *right (or, optimal) size* of tax or subsidy?
 - It's positive (not normative) analysis
 - "Right" or "optimal" means generating socially optimal quantity
- Taxes discourage activity generating negative externalities
 - If Tax > MDC, then
 - If Tax < MDC, then
 - Only if tax = MDC, then
- What should the tax revenue be used for?
 - Offset (or, cover) costs represented by MDC

Imperfect Competition Externalities Coase Theorem **Optimal Subsidies & Taxes**
